Official aluminium volleyball posts set

Each set consists of two fixed posts manufactured according to European Standard EN-1271 in terms of safety, stability and strength.

Description

Set consisting of two fixed poles of total length 3000 mm made of extruded aluminum profile internally ribbed outer diameter of 90 mm. All exposed edges or corners are rounded to a radius of at least 3 mm.
Both poles incorporated in its upper part a pulley of plastics material to prevent oxidation and locking the same, rectilinear system for net tautness inside the pole Original GALVAN, to prevent possible injury of a players. Includes regulatory heights set (2, 2'10, 2'18, 2'20, 2'24, 2'30, 2'40 and 2'43 m.), which are reflected in the side of both poles visible .
Both poles are anchored to the concrete by a metal cylinder 100mm od, which like 450mm anchor welcomes both poles, to a physical stop made in solid aluminum plate bolted to the pole to withstand extreme conditions.
Finished in white powder coated 200ºC to prevent future corrosion allowing easy and quick maneuver anchored. RAL 9016

Technical characteristics

- They are delivered packed in a cartoon box of 300 x 30 x 30 cm.
- Total weight: 40 kg. (Pair).
- Option: Fastenings (42006) and net. Not included.
