

Dummy for basic CPR practice ADULT, with QCPR system, allowing the teacher and students to monitor the functions of the CPR.

Description

Dummy for basic CPR practice ADULT, with QCPR system, allowing the teacher and students to monitor the functions of the CPR.

Technical characteristics

The teacher can monitor up to six students simultaneously from the palm of your hand with any mobile device.

The QCPR instructor app provides an easy-to-see summary of performance that highlights which students may need more guidance. At a glance you can see who is not performing the compressions at sufficient depth, who does not do it at the correct pace or who is ventilating excessively.

You will be able to collect information and data on the performance of CPR in real time. Different options can be used with the manikin, including automatic recommendations for improving CPR after the session.
