Developed to provide maximum reliability and comfort to the viewer.

Technical characteristics

- Width stairs: of 1100 to 1500mm.
- Access tribune: top, bottom or both as required.
- Handrails steel pipe Ø 40mm.
- Structural quality steel S 275 JOH, S 235 JR, (DD 11) SAE 1008.
- 3 wheels per foot and 6 per row rolling polyurethane band. Size Ø 125mm and width 40mm.
- Slip system of platforms through quadruple ball bearing wheels at the bottom and nylon top wheel guide.
- Finished 200°C powder coated according ASTM B-117 >500 hours saline fog environment.
- Setup finishes: Select options tab & type seat (OT 100 800).
- Loading certicate
- To desing and dimensions of the TSA steel structure for the parameters detailed below:
- Extra load of use 500 Kg/m², calculate with a safety coefficient of 3/2.
- Horizontal extra load of 100 Kg per height level to the length sense of the tribune.
- Maximum deflection of L/300.
- Own steel structure load* of 50Kg/m calculate with a safety coefficient of 4/3. (*Without vip seat).
