

Medina de Riosico Playground model Manufactured in wood, with autoclave treatment based on injected salts.

Description

Compound of:

Several towers with and without a roof, joined together by mobile bridges. Three ramps slide down in polyester. Two straight ramps and a spiral ramp.

The entrance to the set will be made by different climbing stairs and a rope ramp.

The set has coupled elements at the ends:

One-seat swing with flat seat covered with rubber.

Climbing wall made of polypropylene cords covered with material, so that children do not damage their hands.

Two low huts joined to the set by wooden corridors.

Not included assembly.

Number of holes 43.

Colors may vary.

IMPORTANT NOTE: Indicate in order observations if it is going to be installed in sand or concrete.
